Simple Way Of Reducing The Loading Time Of The Blog In Blogger Fractal Videos – The Algorithm To Create An Reducing the size of images and graphics is an important thing in the web Designers these days have a hard time with images and graphics. From the old days, we used to design web pages by making a smaller version of the image or graphic. The designer would design the graphics in a large size, and then it would be reduced for printing and e-mailing. Now, however, a designer does not have this option as the image sizes are quite large. You can have a smaller size by resizing the image but then, the quality suffers. Hence, the designers are looking for a way to reduce the size of the image without losing the quality. And here is what we present to you – the new, interesting Fractal Videos. Fractal Videos – The Algorithm To Create An Image Like mentioned above, the new Fractal Videos are a set of algorithms that can be used to reduce the size of an image. This algorithm is based on the well-known fractals, which are mathematical patterns or shapes that repeat and recur at different scales. It is these shapes that create the fascinating patterns that we can see everywhere in nature. The Fractal Videos use these fractal patterns in order to reduce the size of the image or graphics. Let's see how it works: The image or graphic will be divided into several parts, and this process is carried out automatically by the Fractal Videos. For example, the image or graphic is divided into 3 equal parts. The Fractal Videos then analyze these parts and divide them further. After several divisions, the algorithm will generate the fractal pattern that it is looking for. When it comes to the real-life images, the process is a bit different. The Fractal Videos will actually use the fractal patterns that are in the image itself and they will modify them. This is a very exciting process, as the image gets reduced to a fraction of its original size. So, let's see how the image will be reduced in size: The image or graphic is loaded onto the screen. Then, the Fractal Videos analyze the image and divide 77a5ca646e
