In 2011, Mackie released the debut model of the ROLI Lightpad, an acoustic and MIDI device. Light pads are meant for musicians and others who want to be able to use their fingertips to play instruments, control devices, or generate music. Light pads are inexpensive, more portable than the expensive and bulky MIDI controllers, and have a more user friendly interface than traditional MIDI controllers. ROLI's innovative Light Pad technology was featured at the 2012 Consumer Electronics Show in Las Vegas and won the Innovation Award for Consumer Products and Services. With these specs, the new ROLI Lightpad Wireless MIDI Controller promises to be a modern and fun way to interact with your music. But the new wireless option is only the tip of the iceberg. As the experience grows, the capabilities expand. EXA is an open source operating system. KeyMacro allows you to control a program with the keyboard keys. Using KeyMacro, you can change the entire sound of your MIDI tracks using only the keyboard keys. It takes advantage of the controller functionality to allow you to change the instrument, the keyboard or the keyboard mode. Press for chord: (Start): This function is used to activate the guitar mode. For example, pressing the "C" key changes the instrument of the DAW from guitar to piano, while pressing "H" switches the instrument to play from the keyboard. MetaViz 3 Description: MetaViz is an intuitive tool for setting up the appearance of your projects using MIDI CC numbers.
