Kana No Quiz Crack + Download

===================== *Kana* No Quiz is a tool to help you learn to write Japanese characters in a quick and easy way. Why? Because Japanese is written from top to bottom (from the top to the bottom), and is known as a syllabic language. That means that Japanese consists of symbols, called Kana (literally, Kanji in Japanese), which represent each Japanese syllable. Every Kana is composed of a certain number of elements (of "Unified Symbols" or "Unified Kanji", depending on the writer). Please, read the description in the main window and the help button below. Thank you in advance for the support. Example of use: ================ You want to learn the pronunciation of a certain character (or a word), what you should do is create a quiz which represents the character you want to learn. For that, create a small dataset, copy it to the "Data" submenu and then create a quiz from it. For more information, please see the tutorial. How is it created? ================ The quiz is created from two datasets: 1. A "Data" dataset, with a set of characters (almost half of the characters in the hiragana/katakana keyboard) 2. A "Sound" dataset (each character has a sound), which is used when the quiz is played. The two datasets are copied to the "Data" submenu, when the quiz is created. The sound for each Kana is read from "Sound" dataset and converted to the Unicode equivalent. When the quiz is played, the Unicode equivalent is read and converted back to a sound. The compilation is displayed in the main window and in the log file. The help button below the main window shows more information about the algorithm used. Kana No Quiz Crack+ Free Download

The application consists in three lessons, related to the three alphabets (Hiragana, Katakana & Kanji) and in a short test, where a user must recognize the written form of a series of kana. In each lesson, exercises are self-explanatory, and may be done over and over again until completion, with the possibility of a final evaluation. Each lesson has three levels, with the level corresponding to the difficulty of the task; a summary is given at the end of each level, and the last one gives the final results of the user's examination. All written works are in Japanese, but words are made so that they are easily recognizable, with the pronunciation given in English (where the ability to read the romaji or the kana is required). Kana no quiz Tutorials: The application has 10 lessons, each one made of three consecutive lessons, and five intermediate tests. Each lesson is made of some training and of some steps. The training lessons are meant to get acquainted with each step, and it ends with a self-explanatory summary of what we already learned. The step lessons, instead, end with a step exercise, but a step summary is at the end of each step. The intermediate tests are more difficult exercises, so that each time the user learns something new. In order to get familiar with the three alphabets, or to improve the memorization of the alphabets, a test is available, which counts from 30 to 45 points, according to the following chart: The kana quiz consists of ten lessons, each one of them made of three consecutive lessons, and five intermediate test. Each lesson, instead, ends with a step exercise, a lesson summary and a time duration. The last one gives the final results. Some videos are available for the demonstration and the explanation of the applications features. Note 1: The application works on Windows and Macintosh. In Windows, the application is developed under the Windows operating system. Note 2: The application contains a kana dictionary where the names of the kanji are the one who are associated to the pronunciation of each hiragana and katakana. With this application you will be very quickly started in learning the Japanese alphabet. This application will be very useful for the students who wants to learn the Japanese and to improve their comprehension and their writing skills.
